Voice for Change — Holistic Evaluation

รูบริก A · การประเมินผลงาน Voice for Change แบบองค์รวม

PURPOSE · วัตถุประสงค์

Provide the final, official **summative** grade for the learner's capstone artifact — the *Voice for Change* proposal — independent of which expression lane (live audio, uploaded audio/video, or Canva visual) the learner selected. Grade the **argument and its expression**, not the production polish of the lane. This rubric is the rubric the teacher uses; the AI does not grade the capstone — that boundary is the AI-TPACK principle made operational.

OBJECTIVES · เป้าหมายเฉพาะ

- Measure language proficiency across academic, persuasive, and evaluative registers (C1 target for advanced LALA109 learners).
- Surface critical and ethical reasoning quality — especially how the learner engages the strongest counter-position.
- Assess craft of the chosen medium without privileging expensive production over a clearer cheaper one.
- Verify synthesis of the **evidence the learner committed to in-mission** (the q6 commitment carried forward).
- Document AI-collaboration ethics — what the learner did with AI vs. what they own as their own judgement.

APPLIES TO · ขอบเขตการใช้

The learner's *Voice for Change* proposal — one concrete ask addressed to a real Thai community or institution — submitted in any one of three lanes (live audio recording · uploaded audio/video · Canva visual exported and uploaded). The lane is a *means of expression* (CAST UDL); it never changes the bar.

SCORING SCALE · มาตรฐานการให้คะแนน

Five dimensions, each scored 1 (Emerging) · 4 (Developing) · 7 (Proficient) · 10 (Distinguished). Dimensions 1–4 are weighted × 1.0; dimension 5 (AI Collaboration Ethics) × 0.5. Maximum: 45. Bands: 38–45 = A · 30–37 = B · 22–29 = C · ≤21 = Revise & Resubmit.

USED BY · ผู้ใช้รูบริก

Teacher Judges (Tier 3 of the 4-tier hybrid judging system) — the human, summative, official grade. AI Judges produced formative feedback throughout the missions (Rubric B); peer judges scored soft skills (Rubric D); the capstone grade is human-only by design.

PEDAGOGICAL ANCHORS · กรอบทฤษฎีที่ใช้

PICRAT • Creative-Transforms cell • AI-TPACK boundary • CAST UDL 3.0 (multiple means of expression) • Bloom's Revised Taxonomy • Create • Mayer CTML (multimedia integration)

AUTHOR: DR. PAYUNGSAK I

1 • LANGUAGE PROFICIENCY ACROSS REGISTERS • ×1.0

SCORE	DESCRIPTOR
10 • Distinguished	Controls academic, persuasive, and evaluative registers within one coherent piece. Hedging, modality, and metadiscourse used with intent. C1 alignment evident.
7 • Proficient	Generally appropriate register; occasional overreach on persuasion or under-specification on the evidence claim. B2 alignment evident.
4 • Developing	Register slips (the appeal reads academic; the evidence reads conversational). B1 alignment.
1 • Emerging	Register undifferentiated; errors interfere with meaning. A2 or below.

LOOK FOR

Modal verbs in the policy ask; precise citation of the evidence committed in-mission; audience-appropriate affect when addressing the community. *Tier-fair grading*: judge proficiency against the learner's demonstrated control, not against native-likeness; a Tier-1 reader who argues precisely in plainer language is not penalised for plainness.

2 • CRITICAL & ETHICAL REASONING • ×1.0

SCORE	DESCRIPTOR
10 • Distinguished	Defends a clear judgement that engages — not avoids — the strongest counter-position from the missions. The trade-off is named, not smoothed over. Reasoning chain explicit.
7 • Proficient	Position clear; the counter-position is acknowledged but treated thinly.
4 • Developing	Position stated, not defended; counter-position strawmanned or absent.
1 • Emerging	No discernible ethical reasoning; the conclusion is asserted.

LOOK FOR

"however," "even so," "the strongest case against this is..."; explicit handling of the regional trade-off the learner walked (water vs. next generation, clean air vs. livelihood, flood defence vs. tenure, etc.).

3 • CRAFT OF THE CHOSEN MEDIUM • ×1.0

SCORE	DESCRIPTOR
10 • Distinguished	Delivery and structure reinforce the argument: paced narration · clean visual hierarchy · coherent edit — the medium serves the message as one artifact.
7 • Proficient	Structure mostly clear; minor issues (uneven pacing, a redundant slide, a soft open).
4 • Developing	Structure uneven; the audience has to work to follow the argument.
1 • Emerging	No discernible craft judgement in the chosen lane.

LANE-SPECIFIC CUES

Audio — pacing, emphasis, audible structure. *Video* — shot/edit clarity, sound. *Canva visual* — hierarchy, restraint, type scale. Do

NOT

reward expensive production over a clearer cheaper one; a phone recording can score 10.

4 • SYNTHESIS & THE EVIDENCE COMMITMENT • ×1.0

SCORE	DESCRIPTOR
10 • Distinguished	The parts are inseparable; the proposal carries the evidence the learner committed to in a mission (the q6 commitment) — or argues explicitly why it no longer holds. The address to the audience resolves, not repeats.
7 • Proficient	Parts relate, but one is decorative; the evidence commitment is referenced but thinly used.
4 • Developing	Parts sequenced rather than synthesised; the prior evidence commitment is absent.
1 • Emerging	Parts do not connect.

LOOK FOR

Does the proposed action *follow from* the crisis and the evidence, or just sit next to them? Cross-check the learner's recorded evidence-commitment surfaced on the Final Task screen.

5 • DOCUMENTED AI COLLABORATION & AUTHORSHIP ETHICS • ×0.5

SCORE	DESCRIPTOR
10 • Distinguished	AI use is named, contextualised, and reflected on; the learner states which judgements stayed their own.
7 • Proficient	AI use named; reflection generic.
4 • Developing	AI use acknowledged only in passing.
1 • Emerging	AI use not acknowledged.

LOOK FOR

The learner's stated boundary between AI-assisted language and learner-owned judgement — the same boundary the platform models.

NOTES FOR THE GRADER

Score on evidence in the submission, not impression of effort or lane cost. The diagnostic reading tier is a *fairness lens for dimension 1 only* — it never lowers the bar for reasoning, synthesis, or ethics. A learner who reached the capstone has six Keystones; this grade evaluates the capstone itself, independently.
