If you read only one document in this submission package, read this one. Three claims, one verification URL, a two-minute commitment.

What this is

An AI-scaffolded English-language learning platform for **LALA109 · English for Digital Communication Skills** at the Faculty of Liberal Arts, Mahidol University. Six adaptive missions across Thailand, each anchored to a UN Sustainable Development Goal, culminating in a teacher-graded **Voice for Change** capstone – a two-to-five-minute spoken proposal addressed to a real Thai institution.

Three load-bearing claims · all auditable

CLAIM 1 · AI-TPACK ENFORCED AT THE SYSTEM-PROMPT LEVEL

The boundary between what AI handles (scale, formative feedback) and what humans handle (summative grading, cultural authenticity) is **hard-coded into the Claude API system prompts** of Mr Compass and the AI Judges – not merely declared in the application. Open the Judge Tour, Step 8, to see this in the admin console.

CLAIM 2 · THREE LEARNING THEORIES MADE OPERATIONAL

Behaviorism (the Insight-Token economy · operant conditioning), Cognitivism (the 5-stage arc · CTML multimedia), and Social Constructivism (the 3-role asymmetric team · Mr Compass as the More Knowledgeable Other) – **each cited theorist maps to a feature you can click on**. See the Teacher's Manual, Chapter 4, for the full triptych mapping.

CLAIM 3 · COMPLIANCE AND ACCESSIBILITY BUILT INTO THE FOUNDATION

PDPA · พ.ร.บ. คุ้มครองข้อมูลส่วนบุคคล พ.ศ. 2562 · with bilingual consent and 90-day auto-deletion. CAST UDL 3.0 across all three principles. **WCAG 2.1 AA** verified by Google Lighthouse (Accessibility 100 / 100 on Home and the Judge Tour). Mobile-first from 360 px upward.

Where to verify, in one click each

LIVE PLATFORM
